(54) STORAGE MEDIUM AND STORAGE MEDIUM DRIVING DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To improve security.

SOLUTION: This storage medium 1 constituted as a CD-ROM is provided with an antenna coil 3 and an integrated circuit element 2 connected to it. The integrated circuit element 2 receives the supply of power without contacting through electromagnetic induction through the antenna coil 3 and receives data signals. The integrated circuit element 2 transmits key information stored in a built-in memory through the antenna coil 3 to the storage medium driving device without contacting in response to the received data signals. The key information stipulates the procedure of the decoding of disk data and the storage medium driving device decodes read disk data based on the key information.
